PROJECTS

[StuTool Android ↗](#)

Apr 2026 - Aug 2026

Built StuTool, a native Android productivity app with PDF viewing, document scanning, PDF tools, and resume creation. Developed using Kotlin, Jetpack Compose, and Material 3 with an offline-first architecture focused on performance and user experience.

[StuTool ↗](#)

Feb 2026 - Mar 2026

StuTool is a student-focused web application designed to provide useful academic and productivity tools in one platform. The project focuses on simplifying everyday student tasks through a clean, modern, and user-friendly interface. It includes features aimed at improving efficiency, accessibility, and the overall student experience. Built using modern web technologies, the platform emphasizes responsive design, smooth performance, and practical functionality. Through this project, I gained hands-on experience in frontend development, UI/UX design, project structuring, and building scalable web applications.

[Finvovo ↗](#)

Jan 2026 - Feb 2026

Finvovo: Secure Expense Tracking with Professional Reports
Take control of your financial future with Finvovo, a privacy-focused personal finance manager built for serious money management. Track daily expenses, manage budgets, and generate professional financial reports with ease. Your data stays protected with biometric authentication and secure on-device storage. Finvovo follows a local-first approach, so your financial history remains private and accessible even offline. Export detailed reports in Excel (.xlsx) and PDF formats for tax filing, accounting, or record-keeping. Get smart insights, clean financial summaries, and automated background updates without extra effort. Built with modern Material 3 design and optimized for speed, Finvovo delivers a smooth, dark-mode ready experience powered by the latest Android technologies. Download Finvovo and manage your money with confidence.
